Who Qualifies for This Program?
Customers who own single-family homes whose primary heat source is electric and have an active PUD account. Owners of multi-unit buildings that are three stories or less and contain two or less residential living units may also be eligible. You can find full details about qualifications and restrictions at www.snopud.com/weatherization or call our Energy Hotline.

PUD Registered Contractors
The PUD has a list of local contractors who are qualified to perform any energy improvement covered by our program. You can view the lists as follows:
Heating: www.snopud.com/heatcontractors
Insulation: www.snopud.com/insulationcontractors
Windows: www.snopud.com/windowcontractors

An Energy Smarty Pants knows that PUD weatherization incentives help save energy & money!

Rev. 01/15
An electric heating system can account for 50% or more of your winter PUD bills. Making smart investment decisions about weatherizing your home or upgrading your heating equipment can have a big effect on your utility bills and your comfort.

**Weatherization Incentives**

To help finance weatherization improvements, Snohomish PUD offers cash incentives to qualifying customers with electric heat.

---

**Eligible home improvements:**
- Floor, wall and ceiling insulation
- Duct sealing and insulation
- Energy-efficient windows, skylights and sliding glass doors
- Heat pumps (ducted)

---

**Cash Incentives**

*To be eligible for a cash incentive, all work must be authorized by the PUD before any work begins.*

All work must be installed by a PUD Registered Contractor.

You may also be eligible for an Energy Smart loan from Snohomish County!

---

**It’s easy to participate!**

1. Visit [www.snopud.com/weatherization](http://www.snopud.com/weatherization) or call the Energy Hotline for more information.
2. Select a PUD Registered Contractor and solicit bids.
4. PUD reviews and approves your proposed work.

*All work must be authorized by the PUD before any work is started.*

---

**Ductless Heating/Cooling System**

If you have electric heat, another option to consider is installing a ductless heat pump system. These efficient units provide both cooling and heating, require no ductwork and are simple to install. They use ultra-quiet fans to circulate air evenly throughout the room, eliminating hot/cold spots. Check out the PUD rebate offer. For details, visit [www.snopud.com/dhp](http://www.snopud.com/dhp).
