SNOHOMISH PUD CONTRACTOR BULLETIN
#2014-01

DATE: March 19, 2014
TO: PUD Registered Contractors
FROM: Snohomish PUD – Residential & Small Commercial
RE: IMPORTANT PROCESS CHANGES

EFFECTIVE DATE: March 1, 2014

Process Changes:

Minor Deficiencies
• Effective immediately, minor deficiencies must be addressed before incentives will be paid. (Previously, with customer approval, payment could be approved for jobs that had minor deficiencies upon inspection, with the understanding that the work would be completed as soon as possible.) This change applies to all measures.

Bid Form Updates
• Windows bid forms now include space for data to be included about the customer’s existing installation.
• Your cooperation and accuracy in gathering this data will help support PUD efforts to develop a more streamlined inspection process, while ensuring that energy savings claims are verifiable.
• Updated forms are available on the Snopud website (From www.snopud.com/tradeallies following the link for >>Information for Weatherization & Heating Contractors.)

Reminders:

Qualifying Heat Type
• Please remember: the customer’s home must have permanently installed electric heat as the primary heating system to be eligible for participation in the PUD Weatherization and Heating programs.
• PUD Registered Contractors who submit a Participation Application and Agreement, PUD Uniform Bid Sheet, and/or Rebate form(s) with inaccurate program eligibility information are subject to incentive/rebate forfeiture and delisting.
