Tell Us What You Think
The PUD is working with OnTarget Consulting & Research to get your feedback on participating in our Registered Contractor program. Using an online survey, OnTarget will be gathering your perspective on what's working, what's not, and what would make the program more valuable to you. Watch for your company's invitation by email this month. Your responses will be completely confidential, so don't hold back!

Program Update: Bye Bye D-I-Y
Effective Jan. 1, 2015, Do-It-Yourself (DIY) weatherization projects will no longer be eligible for PUD incentives. To qualify for PUD incentives on efficient windows, insulation or heat pumps, customers will be required to work with a PUD Registered Contractor. Ductless Heat Pump (DHP) rebates will also fall under this new requirement. DHPs will only be eligible for a rebate when they are installed by a PUD Registered Contractor.

The chart to the right shows how many of each measure have been installed in 2014 (to date), broken out by installer type.

In 2015, DIY jobs will not be eligible for PUD incentives.

Welcome, New Contractors
The PUD is pleased to welcome the following Registered Contractors to our program. The next enrollment opportunity will be in 2015.
- Advantage Contractors, Inc.
- Anchor Home Comfort
- Environmental Pest Control & Insulation, Inc.
- Repair Pro LLC
- SRC, Inc.
- WSB Sheet Metal Company

Seinergy
Snohomish PUD has again engaged the services of local company Seinergy (seinergy.org) to help us track energy savings that are achieved in our region without our incentives. We value all the quality work that our Registered Contractors do to help our mutual customers save energy in their homes, and encourage you to cooperate with Seinergy if their services are of interest to you. Any data sharing or financial arrangement you make is strictly between you and them. If you have questions about the PUD's role, please contact Cathy Anderson via email at cjanderson@snpud.com.
Reminder: Pre-Approval Required
Please remember any work done through the Weatherization and Heating program* requires pre-approval and an Energy Services Authorization (ESA) from the PUD before work commences. Penalties may include forfeiture of the incentive and a 30-day suspension. The PUD has no obligation to pay an incentive for a job that was started without pre-authorization. It’s painful for everyone when this happens, so please take note!

*This requirement does not apply to DHPs, which are processed as rebates and therefore do not require pre-approval.
