SNOHOMISH COUNTY PUD

GET A SMART REWARD

when you buy an eligible smart thermostat!

Installing a smart thermostat can help you reduce energy costs and keep your home comfortable year-round. Smart thermostats can learn your daily schedule and use local weather information to make energy-saving temperature changes automatically.

Because they are Wi-Fi enabled, smart thermostats allow you to manage your home heating/cooling system from anywhere, using your mobile device.

\$75 PUD Reward

The PUD offers a \$75 reward to eligible customers who purchase and install a qualified smart thermostat in their home.

Eligibility Requirements

If you are a PUD customer, your home is heated by an electric forced air furnace or ducted heat pump, and you live in a single family (not exceeding 4 attached units) or manufactured home, you are eligible for this Reward. (One per home.)

The thermostat must be on the Qualified Products List in effect at the time of purchase (see website below), and you must apply for your Reward within 90 days of purchase. Reward may not exceed purchase price.

Installation Requirements

To qualify, your thermostat must

- be set to your home's geographic location
- have the occupancy detection set to "on"
- be registered as connected with the manufacturer
- be programmed to recognize the heat pump system (if it is controlling a heat pump)

The thermostat may be installed by either you or your contractor.
