

Grade & Stakes

1373 06/07 Rev.

DEVELOPMENT:

W.O. No.

Location: _____ 1/4 of Section _____, Township _____, Range _____

I, the undersigned, have been duly authorized to coordinate with Snohomish County PUD No. 1 ("PUD") personnel as to confirmation of property stakes, final grade of road right-of-way(s) and proper installation of conduit where applicable.

I agree that property stakes are correct and that the final grade is or will be established as I have coordinated this day.

And, should the PUD be required to install its equipment on private or easement property due to the condition of the terrain or type of road construction, a final grade for this area will be established by the Developer for the benefit of the PUD's installation(s). Accordingly, the underground electrical distribution equipment can be placed and located correctly.

The PUD will not be held responsible to relocate, at its expense, any equipment due to incorrect information provided or changes of grade and/or property stakes.

And in regard to all road crossings installed by the PUD, it is requested that the Developer or a responsible party inspect the roads immediately upon completion of the underground distribution system and/or road crossings. The customer will be required to notify the PUD within 72 hours concerning any changes that might occur as to the condition of the road crossing. When changes have been made, the roads shall be accepted by the undersigned and the PUD will not be held responsible to return at a later date for any further repairs.

Conduits installed by the customer, into which the PUD will install conductors, shall be done in a workman-like manner and acceptable to the PUD. Any obstructed or crushed duct which would prohibit the PUD from installing its conductors will be repaired by the customer and any lost time suffered by the PUD, due to improper installation of the conduit, will be charged directly to the customer.
