

Safety Review

Energizing Life in Our Communities

Power Lines in the Work Zone

Planned: **Equipment near power lines**

Ref: WAC 296-54-529 [Link](#)
WAC 296-155-53408 [Link](#)

Situations: Working within 20' of any power lines

Overview

- Snohomish County PUD values the safety of our community and customers, which also includes those working and doing business around the utility's electrical infrastructure.
- Power lines shall be presumed energized unless Snohomish County PUD confirms otherwise.
- Refer to WAC 296-155-53408 to identify which option is feasible around power line safety.

Discussion Points

- Please contact PUD Customer Engineering at 425-783-8272 (M-F, 8 a.m. to 4:30 p.m.) to schedule a review of your project and discuss potential line clearance issues.
- During the site meeting, we will review your planned work zone and discuss work site hazards and solutions, etc.
- If there is any PUD emergency on site, please contact 425-783-1001 to report. Available 24/7.
