

# Thank you for helping us manage times of peak energy!

*Reminders of when we may call on you for assistance*

*Between Nov. 1 and Feb. 28*

*Up to 3 events per week*

*No more than 15 peak events per season*

*Events are typically on weekday mornings and evenings*

*Events may be 3 to 4 hours in length*

## **Weekday Peak Events Nov. 1-Feb. 28**

Providing energy to our customers during peak use periods raises the PUD's costs to serve power. These peaks generally occur during the morning (7 to 11 a.m.) and evening (5 to 9 p.m.) during the winter. Keeping your energy use low during peaks helps the utility avoid buying extra energy to meet demand, makes renewable energy stretch further, and keeps your bill low.

Between Nov. 1 and Feb. 28, the PUD will call peak events and ask participants to shift their energy usage to other times. See the back of this card for some guidelines of when events may be called.

**We appreciate your participation in the FlexEnergy program pilot, which runs from Oct. 1 2021 through March 31, 2023.**
