

PUD

Energizing Life in Our Communities

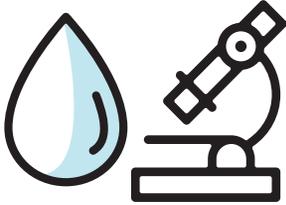

THE WIRE

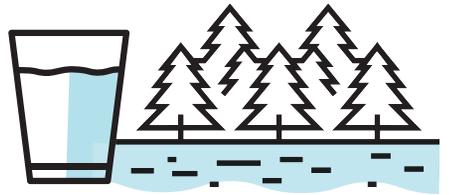

MAY 2024 / SNOPUD.COM

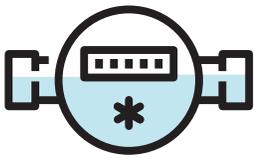

The first full week of May is National Drinking Water Week. In today's world, it's easy to take for granted safe, reliable and clean drinking water. But it takes a team of outstanding people to ensure that it remains that way. We're proud of our Water team!

The PUD operates four water treatment plants and regularly tests its water supply for impurities to ensure quality.

Our beautiful Spada Lake provides more than 75% of the fresh water supply for Snohomish County.

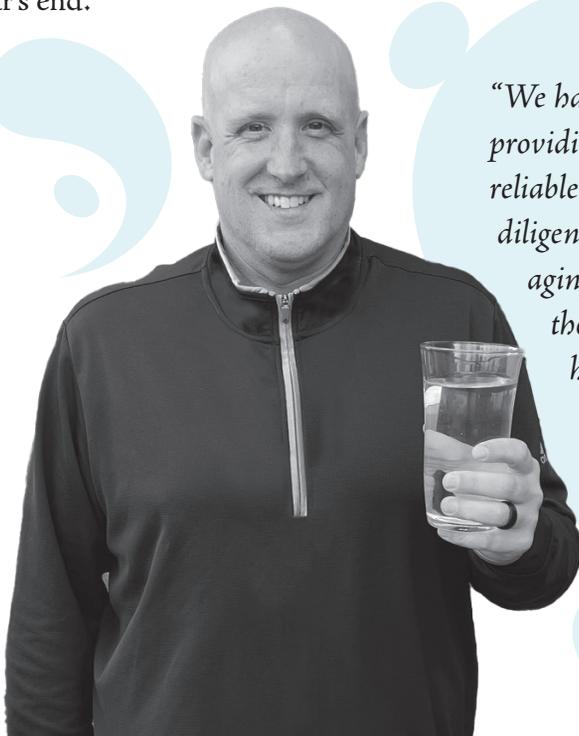

The Connect Up water deployment team has installed more than 4,000 advanced water meters so far. The team hopes to exchange the other 19,000 water meters by next year's end.

Celebrating
all that is
H²OH!

Conservation is critical to protecting our water supply. Today's toilets and energy-efficient laundry appliances and dishwashers save water. Upgrade now!

"We have a tremendous legacy of providing our customers with safe, reliable drinking water. Our work, from diligent water sampling to replacing aging infrastructure, will maintain the high standards our communities have come to expect."

– Jeff Kallstrom, PUD Assistant General Manager of Water

Meet Chris Britsch, Analytics Leader

Data, data, data! In today's utility world, data is critical to providing greater insights into an organization like the PUD. Chris, PUD Senior Manager of our Data & Analytics group, was recently recognized as the 2023 Best Utility Analytics Leader by the Utility Analytics Institute for his work advancing analytics in the utility industry.

Chris (right) collecting his award

The work Chris and his Data & Analytics team perform supports the PUD as it strives to build a brighter future.

The team works with leaders across the utility to use data engineering for insight into operations and innovative solutions to problems. With projects like Connect Up, aligning that data with the PUD's strategy is crucial.

Learn about PUD's New Battery Project

The PUD is partnering with Ameresco, a leader in clean energy development, to build the largest battery energy storage system (BESS) in the Pacific Northwest. Learn more about this project and how it will help lead the clean energy transformation at our next Power Talks, noon to 1 pm on Thursday, May 30. Register today: snopud.com/power talks.

Connect Up Crosses 10K Milestone

In March, our Connect Up team installed their 10,000th meter. Most exchanges have occurred in the Mill Creek/Bothell area.

Our supply of advanced meters has increased over the past few months as supply-chain issues improved, which will increase the frequency of exchanges in the future. For more, visit snopud.com/connectup.

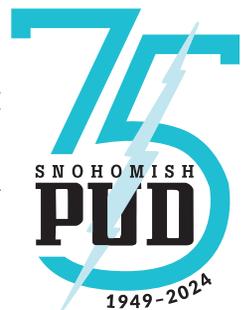

Bask in the Joy of New Windows

Save up to \$100 per new window or sliding glass door for your electrically heated home.

Celebrating 75: '80s Conservation Sensations

For the PUD, the 1980s meant boom boxes, big hair and awesome energy savings! By 1989, the PUD's conservation programs had reached 1 billion kilowatt hours in savings. Read more on our history at snopud.com/75.

While you're there, don't forget to enter to win a \$75 bill credit! Entries start fresh each month until October.

Congratulations to last month's bill credit winner Dave D. of Everett!
