**DETERMINATION OF NONSIGNIFICANCE (DNS)
(WAC 197-11-970)**

Name of Proposal:

Spada Lake Wildlife Habitat Improvement Thinning

Description of Proposal:

The proposed project includes thinning twelve units across approximately 155 acres of forest on Snohomish PUD's Spada Lake Tract. The goal is to improve wildlife habitat by creating structural complexity in the stands and increasing sunlight to the forest floor, thereby increasing understory forage and berry production in accordance with the FERC approved Terrestrial Resource Management Plan for the Henry M. Jackson Hydroelectric Project. Approximately 0.56 miles of road construction is planned to access landlocked units, of which approximately 90% consist of reconstructing/restoring existing road grades; these grades will be abandoned when work is complete. Access to several units is through State-owned roads and will require cutting of access right-of-way through DNR property onto Snohomish PUD property. Stands to be thinned are predominantly comprised of homogeneous, even-aged western hemlock, silver fir, and Douglas fir, with smaller proportions of western redcedar and red alder. The stands range in age from approximately 40 to 60 years. Understory vegetation includes sword fern, deer fern, salmonberry, and western hemlock seedlings and saplings.

Proponent:

Public Utility District No. 1 of Snohomish County

Location of Proposal, including street address, if any:

This project is located on PUD's Spada Lake Tract in Snohomish County, about 13 miles northeast of Sultan, WA. The legal description for the parcel is sections 20, 26, 27, 29, 33, and 34, Township 29 North, Range 9 East W.M. The parcels on which the project will take place do not have a street address but they are located at the end of Sultan Basin Road around the Spada Lake reservoir.

Lead Agency:

Public Utility District No. 1 of Snohomish County

The lead agency for this proposal has determined that it does not have a probable significant adverse impact on the environment. An environmental impact statement (EIS) is not required under RCW 43.21.030(2)(c). This decision was made after review of a completed environmental checklist and other information on file with the lead agency.

This DNS is issued under WAC 197-11-340(2); the lead agency will not act on this proposal for 14 days from the date below. Comments must be submitted by January 6, 2026.
